

DESIGN BEFORE HIRING

Telling the whole story when it comes to your team's vision

JESSA PARETTE | 2022 DESIGN LEADERSHIP SUMMIT

 @jessaparette

A little about me:

HEAD OF DESIGN RESEARCH
STRATEGY & SYSTEMS

AUTO FINANCE | CAPITAL ONE

First

Let's start with a familiar story

Once upon a time...

Everything was terrible

Yikes

Does this sound familiar?

Surprise!

That person was me 🙌

What will we cover?

1

Hiring the RIGHT people requires leadership skills that are often untaught, undeveloped or taken for granted.

2

Interviews alone cannot clarify who the right person is and why. We must learn how to write the full story.

3

We have the design tools and training we need to rethink our self-discipline in hiring and building a team.

Why now?

THERE IS A WAR
FOR TALENT

Even if you have don't
have positions to fill, you
are battling the fight for
developing people

IMPORTANT
DECISIONS ARE
ABOUT PEOPLE

Choosing a team is
about creating culture
and ecosystem that
produces despite
adversity

THERE IS
A NEW
GENERATION OF
DESIGN LEADER

We owe it to our
community to be the
mentors we may or may
not have had

WHAT I
HOPE
YOU GET
OUT OF
THIS

A greater
appreciation for the
role you, as a leader,
play when it comes to
building culture

WHAT I
HOPE
YOU GET
OUT OF
THIS

A fresh perspective on
how you are
empowered to envision
your team

WHAT IS THE PROBLEM?

Organizations often **take leadership skills in hiring for granted**, or rely on systems designed for efficiency in filling roles, not necessarily human empathy, to hire candidates.

WHAT IS THE PROBLEM?

While companies have abundant systems for interviewing and recruiting, leaders face an **anemic level of resources in learning the art of hiring well.**

We are not as good at it as we may think.

Things you may see as a result

Everyone is the same-ish level, but job duties are all over the place

Things you may see as a result

"Welcome to
[blank company]"

Things you may see as a result

Different design teams have different hiring practices

Things you may see as a result

Every few years,
someone tries to
recreate the
onboarding
system

Things you may see as a result

Minimum requirements are written in “legal language” and cannot be changed

So, as design leaders,
what are we do to?

Why, design differently, of course

Joining your team is like a story

Story

.....

.....

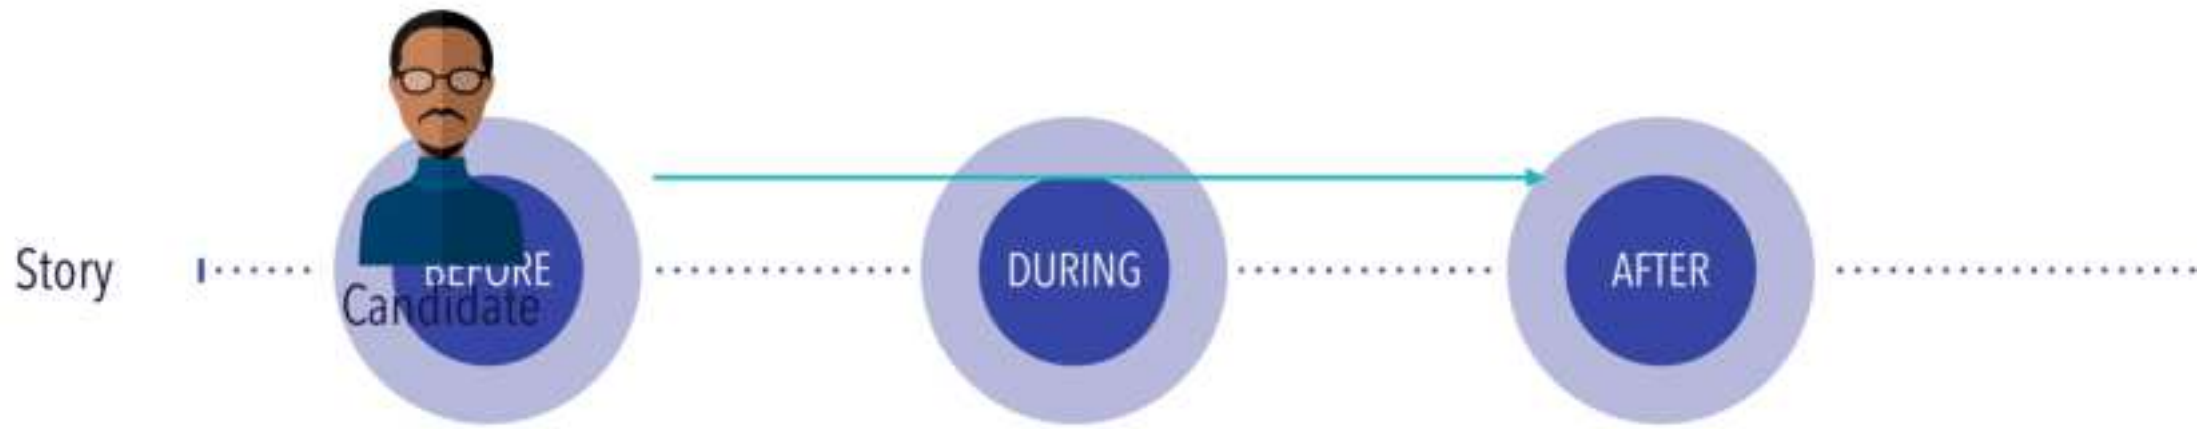

.....

.....

Story

I.....

.....

.....

.....

BEFORE: "What is the vision?"

Design Leader

"What motivates this person?"

BEFORE: "What is the vision?"

Design Leader

"What are their strengths?"

BEFORE: "What is the vision?"

Design Leader

"Why do I need this role?"

DURING: "Where are we now?"

"What is the vision for your team?"

DURING: "Where are we now?"

Design Leader

What does your work look like?

DURING: "Where are we now?"

Design Leader

Why do you want this role?

DURING: "Where are we now?"

"What is happening now?"

DURING: "Where are we now?"

"What caused you to need these particular skills?"

AFTER: "Where are we going?"

Design Leader

"What do they want to achieve?"

AFTER: "Where are we going?"

Design Leader

"What outcome should their quest have?"

AFTER: "Where are we going?"

Design Leader

"In the end, what do they accomplish?"

AFTER: "Where are we going?"

~~What is what a candidate does not because of my skills~~
"What is what a candidate does not because of my skills"

AFTER: "Where are we going?"

"What will change because of my work?"

Most hiring journeys cram everything into the interview

The **consequences** last longer than
you think

CONSEQUENCE #1

YOU ADJUST THE
CULTURE WITH
EACH HIRE

Every hire &
promotion changes
the standard

CONSEQUENCE #2

YOU BUILD A
HOMOGENOUS TEAM

Diversity does not
just "happen". It
must be
intentional.

CONSEQUENCE #3

**HIRING MISTAKES
ARE EXPENSIVE**

It takes up to 12
months for a new
hire to gain traction

CONSEQUENCE #4

HIRING IS EASIER
THAN FIRING

Poor leadership
drives out good
team members

CONSEQUENCE #5

**YOUR TEAM CHARTER
SEEMS UNEVEN**

**Role confusion,
poor level clarity &
lack of direction**

Questions pile up

"How does this role fit with the larger team?"

Questions pile up

"What should motivate this person?"

Questions pile up

"How does this particular UX research role differ from the other roles we have at the same level?"

Questions pile up

"Are we all doing the same work?"

Questions pile up

"Are we promoting arbitrarily or do we actually have clear paths for what is required?"

Back Up

Continuing the story...

OMG

This is a design problem. Duh.

I was missing parts of the story

My story |

DEFINE THE
NEED

INTERVIEW

WORK
TOWARDS
GOAL

But I was a designer. I could design anything.

My story |

THE BEFORE

PART 1:

Clarify the need

Think:
"WWADO"

**WHAT WOULD A
DESIGNER DO?**

Think:
"WWADO"

**A DESIGNER
WOULD DESIGN**

CREATE PROTO-PERSONAS FOR YOUR VISION

Articulate the subjective and objective needs of the role with creativity & freedom

What if I
designed a
persona of my
perfect
candidate?

FIRST NAME
LAST NAME

“What quote would illuminate what this individual cares about in relation to their role?”

JOB: General Idea of a Title

BIO:

What background is important for you to think through? What kind of work or collaboration would signal that their experience gets close to what you need to look for in a candidate? Put that here

GOALS:

- What is the vision that drives this individual?
- How does it relate to the vision for your organization?

KEY ROLE

- What are the 2 - 3 specific focuses that matter for this role?
- This isn't a job description, but one step lower than the goals section, which is how you translate the key outcomes or results that are expected

STRENGTHS:

- What is the person good at doing that matters? Are they a good people leader?
- Do they know when to push back against product, or mentor others into lead ing work? Are they a good storyteller or do they shine when given a problem?
- Do you need someone who is a linear thinker or more abstract? This is where you put strengths or personality compositions you know you need

RESPONSIBLE FOR

- Think through 3 - 4 categories of responsibility that would encompass the general idea of the role. For example:
- Drives the reasoning and decisions for the budget that will meet the team's needs in the next year
- Meets 1:1 with peer leaders monthly
- Recruits, hires and mentors members of their team
- Willing to do whatever it takes to remove roadblocks within her organization

LEX
FAYED

JOB: Program Operations Strategist

BIO:

Lex got their MBA from Ohio State before securing a job as account lead for a financial firm in London. There, they joined a professional organization for product management, learning how to build great teams with great practice

GOALS:

- Pursue value adds of support & proactive operational process that will help teams focus on serving the customer
- Make design operations a hub of innovation

KEY ROLE

- Create and maintain a holistic view of the work happening on the teams in order to make connections, identify opportunities, and ensure alignment to strategic priorities
- Partner with team leads to assess, identify & improve portfolio management

STRENGTHS:

- Has an eye for organization and knows how to create macro and micro views that tell leadership where to focus
- Strong program management that drives deadlines and coordination of work
- Knows how to lead people & gain buy in
- Can identify when and how to make tradeoffs between speed and quality

JESSA PARETTE | www.jessaprette.com

"Where does our strategy need to have strong operational discipline in place?"

RESPONSIBLE FOR

- Collaborating with peer partners and the head of design to improve shared systems, processes, and rituals for the organization at large
- Run program level view of work in flight, sprint prioritization and velocity for entire team
- Leading effective program level planning routines, such as initiative refinement and PI planning
- Hires, trains and develops members of the team reporting to them to build well-managed and high performing team

LEA
CHOI

JOB: Senior Product Leader

“Where is the next key market and how are we staying ahead of the competition?”

BIO:

Lea graduated with a MFA in innovation and service design from Carnegie and worked six years as a product manager before going on to get their MBA from Columbia. They are considered an expert in the field of service design, and known for being able to transform even the most archaic organizations into producing consumer grade products both internally and externally.

GOALS:

- To revolutionize organizational product development so any product created is recognized by peer organizations as ground-breaking in some way

KEY ROLE

- Change how product value and creation is determined.
- Protect progress from the dangers of short cut “efficiencies”
- Decrease ineffective cost across the organization by investing in the right resources

STRENGTHS:

- Focuses on quality of impact, not only quantity, and knows when product managers, engineers or UX leaders have excluded key partners in the process
- Models the behavior and attention to detail and quality that they expect from leaders within their organization
- Fearless when faced with changing organizational habits that slow progress
- Hires good people, holds them accountable, and then gets out of their way

RESPONSIBLE FOR

- Setting the vision and strategy for digital evolution in key markets
- Work closely with the CEO & management to build roadmap for scaling products & translating the work to operational excellence
- Willing to do whatever it takes to remove roadblocks within their organization
- Provide strategic, hands-on leadership to the product organization by diving design thinking through each area of discipline
- Study and understand the market to identify new target segments and markets and evaluate market trends, while considering new approaches to delivering value to customers

MIA
LONG

JOB TITLE: Senior Design Lead

BIO:

After graduating with a bachelor's degree in graphic design, Mia started out designing in an agency. They then took on a leadership role as a creative director, but has never strayed far from being a graphic junkie at heart.

GOALS:

- Partner with junior designers as a leader and trainer.
- Create and execute granular design strategy to products.

MOTIVATIONS:

- Build a deep design standard that is a consistent standard for how design quality is translated to development, design, research and product.
- Increase the maturity of design not just in the team, but with our business partners as well.

STRENGTHS:

- Classic training in typography, color palette, color theory and design platforms.
- Knows how to manage designs and designers from start to finish.
- Understands when designs need final review by the senior manager, and how to get the product designs ready for that review.

"Will this help the user achieve their end goal?"

BEHAVIORS:

- Sets up cadences for weekly design reviews with junior designers on projects the junior designers are working on.
- Helps junior designers ideate on wireframe delivery cadences.
- Sets up concept reviews with product owners.
- Meets with senior manager 1:1 to go over progress on product design and sets up final design reviews on products with the senior manager.
- Manages team of junior designers and works closely with her leadership to remove any roadblocks for the design team.

JESSA PARETTE | www.jessaprette.com

HERE IS WHAT IT MIGHT LOOK LIKE

ELLA
SAMEL

"It's my job to make the details delightful for the user."

JOB TITLE: UI Designer

BIO:

After graduating with a bachelor's in graphic design, Ella went on to get their master's degree in interactive design with a concentration in service design. This is their first job since graduation, and they are relocating from Houston.

GOALS:

- Break new ground in user experience design by exploring design where few companies have ventured
- Become a design leader in the company and within the industry

MOTIVATIONS:

- Be able to see the impact of their design ideas
- Being a thought partner with the business, not just a designer

STRENGTHS:

- Has an eye for color balance, pixel perfection and design alignment across an entire product
- Creative in blending technical, user and business requirements in the design into experiences that go beyond what was simply asked
- Cares about the quality of what is delivered, not just the quantity

BEHAVIORS:

- Meets weekly with the senior designer to go over design progress and get feedback on the latest design for products
- Interacts with engineers and product owners early on in the lifecycle of the product and throughout the design lifecycle
- Brings designs to the team during design reviews
- Partners with researchers to understand how testing will impact what users want from the designs

Tips when designing proto-personas

SEEMA LING
"It takes hard work to make things simple for users."
JOB TITLE: Design Researcher

BIO
Seema has always been fascinated with how things work in design, which is why she got her master's in user experience design. She has worked for several Fortune 500 design teams & collaborated with developers.

GOALS

- Build a systems mindset and design capability within their team
- Be an advocate for users in a way that the company has never before seen

MOTIVATIONS

- The ownership of products from start to finish so that ideas don't get lost
- To make a solid working relationship with engineers and product owners
- Change how that type of user experience and the importance of design

STRENGTHS

- Her experience in both research and design, but leans more towards design
- Knows how to connect insights from user research into usable
- Actively tries new design trends in products and teaches other designers
- Understands the fundamental principles of design

ETHNICS

- Works 1:1 with the user designers to gather design and give solutions for projects of different products.
- Takes part in all events with researchers and product owners
- Spends 50% of their time on design and 40% on conducting research
- Does design and research sessions with the team to present their work
- Leads research activities as the user guide

Use diverse photos & names

Diversity doesn't start after someone applies for a role. It starts with how you build a vision for your team

Tips when designing proto-personas

SEEMA LING
"It takes hard work to make things simple for users."
TITLE: Design Researcher

BIO
Seema has always been interested with how humans interact with design, which is why they got their master's in user experience design. They have worked on user flow, brand design, mobile UX, and teams with collaboration with development.

GOALS

- Build a systemic research and design capability within their team
- Be an advocate for users in a way that the company can relate better with

MOTIVATIONS

- Take ownership of products from start to finish so that ideas don't get lost
- Create a robust working relationship with engineers and product owners
- Change how developers see user experience and the importance of design

STRENGTHS

- Has experience in both research and design, but leans more towards design
- Knows how to connect design features and product into together
- Ability to see design trends in products and teaches other designers
- Understands the business value proposition of design

BEHAVIORS

- Spend 1 hour on user research for a product design or design solution for the concepts of different products
- Take part in activities with researchers and product teams
- Spend 30% of their time on design and 70% on conducting research
- Avoid design and research teams with the team or product team work
- Learn research activities across various products

BEHAVIORAL CHART

BEHAVIOR	SCALE
RESEARCH	100%
DESIGN	70%
CONDUCTING RESEARCH	30%
TEACHING OTHER DESIGNERS	100%

JESSA PARETTE | www.jessaparettedesign.com

Make it bigger than the role

Goals and motivation should be evergreen. Make them big but achievable with the ability to expand as the person grows.

THE AFTER

PART 2:

Setting the goal

Think:
"WWADO"

**WHAT WOULD A
DESIGNER DO?**

Think:
"WWADO"

**A DESIGNER
WOULD DESIGN**

IN A YEAR, WHAT WILL YOU THANK THEM FOR DOING?

Articulate what will be different or what will change in 365 days because of this role

What am I
thanking this
role for doing a
year from now?

"Dear [insert role]"

It's been a year and

HOW TO BUILD THE THANK YOU NOTE

Clarify the specific outcomes & expectations that this role does

FIRST ASK YOURSELF

“Why do I need this role?”

- Put a few reasons
- Be specific
- Example: **“We need a design system engineer to bring our code up to standard”**

HOW TO BUILD THE THANK YOU NOTE

Clarify the specific outcomes & expectations that this role does

FIRST ASK YOURSELF

“What will this person work on?”

- Be specific but not prescriptive
- Example: **“They will work on creating standard documentation and bringing all design teams up to speed on the changes.”**

HOW TO BUILD THE THANK YOU NOTE

Clarify the specific outcomes & expectations that this role does

FIRST ASK YOURSELF

"If they work on this, what will be different in one year?"

- When they work on X, what will be different?
- Clarify but don't dictate
- Example: **"In a year, we will retire all old documentation and have a roadmap for converting to the new token code."**

HOW TO BUILD THE THANK YOU NOTE

Dear [ROLE]

Thank you for **[doing something]**. Because of your work in **[project]** we are now able to **[outcome]**. Thanks to your work this year, we now we have **[thing that is different]**.

Because of your great ability to **[do the role expectation]**, we've seen a difference in **[outcome]**.

THEN, FILL IN THE BLANKS

Dear **Design System Engineer**

Thanks to your work this year, **we now we have reduced our tech debt from old documentation and have a clear roadmap** for what the next year will be!

Because of your great **ability to mentor junior engineers** in how to work with design teams, we've seen a difference in **how designers want to collaborate with our design system team!**

**THEN, FILL IN
THE BLANKS**

Dear **Design System Engineer**

Because of your great **ability to mentor junior engineers** in how to work with design teams, we've seen a difference in **how designers want to collaborate with our design system team!**

THEN, FILL IN THE BLANKS

Dear **Design System Engineer**

Thanks to your work this year, **we now we have reduced our tech debt from old documentation and have a clear roadmap** for what the next year will be!

Thank you for **bringing our design code up to standard**. Because of **your work in documenting tokens** we are now **able to standardize how other design teams use code**. Because of your great **ability to mentor junior engineers** in how to work with design teams, we've seen a difference in **how designers want to collaborate with our design system team!**

Why this
helped

It became easier to clarify how
the individual contributed to
the team's purpose

Why this
helped

It reaffirmed trust in the purpose for the role, and that anyone in the role would indeed have a purpose behind their work

"Purpose affirms trust, trust affirms purpose, and together they forge individuals into a working team."

Stanley McChrystal

HOW YOU CAN USE THESE

Like a team charter,
writing it down
clarifies purpose -
first within yourself
and then to others

HOW YOU CAN USE THESE

It makes you
evaluate if you need
one role or several

HOW YOU CAN USE THESE

Like a team charter,
writing it down
clarifies purpose -
first within yourself
and then to others

Tips when writing the thank you note

"Dear [insert role]"

It's been a year and

Use action verbs

"Thank you for changing _____"

"Because you _____ were were able to _____"

"When you proactively _____ it made way for
_____"

Tips when writing the thank you note

"Dear [insert role]"

It's been a year and

Make room for personalization

You are not telling someone how to do their job. **HOW** they do the work is up to **THEM**. You are clarifying where the team is going and **WHAT** needs to happen.

Tips when writing the thank you note

"Dear [insert role]"

It's been a year and

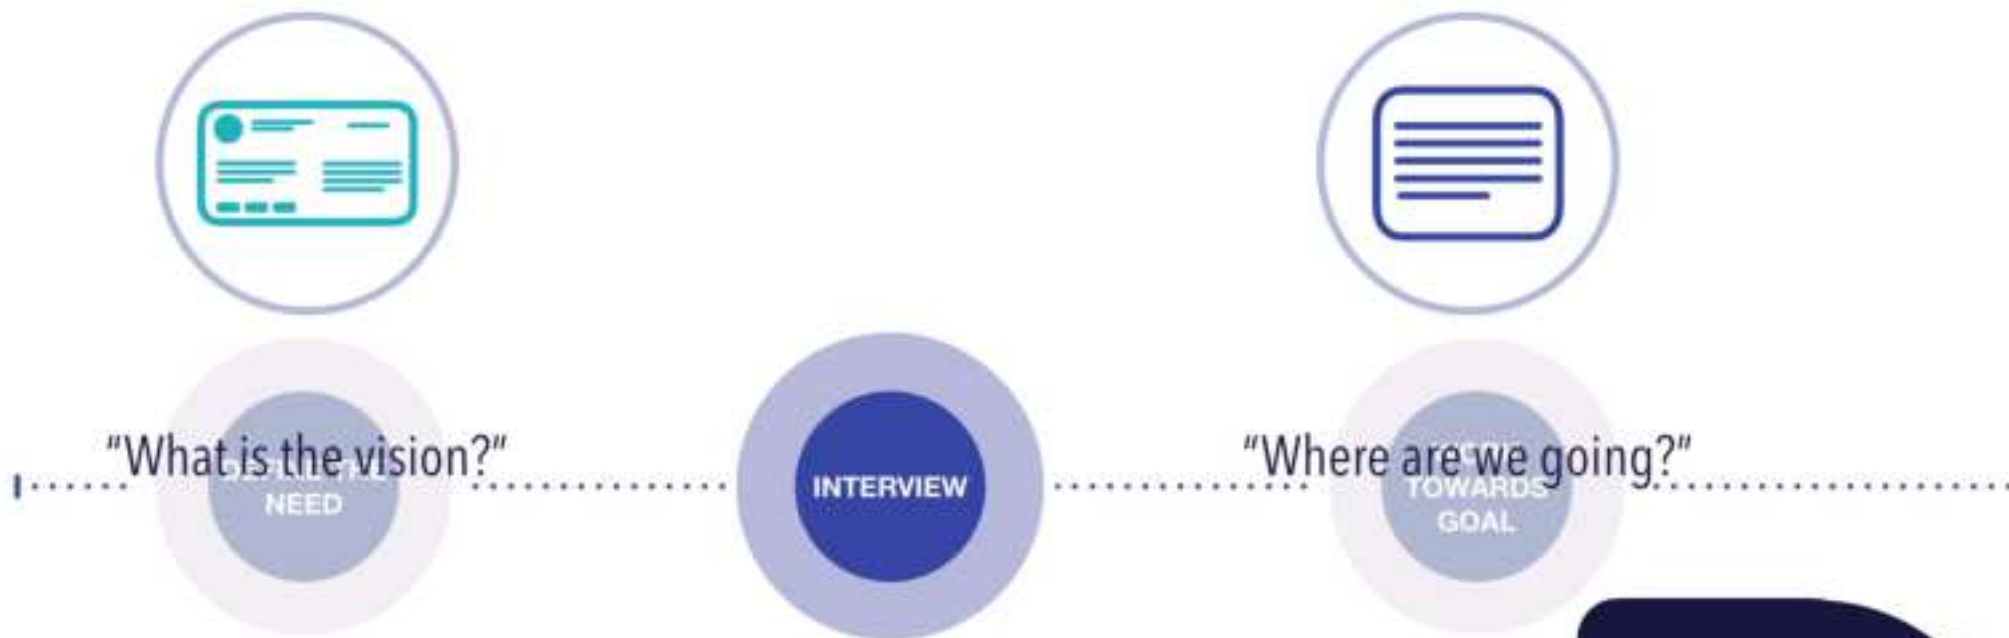

It's imagination, not evaluation

Use this to show where you want to go, but do not use it as a performance evaluation.

Our
story

PART 3:

In conclusion

Nothing you do as a leader is going to be more important than how you hire and develop people.

Thank you
